

## 1 Xpression Classic S-Shape

### Manual turntable with 8,6" S-shape tonarm

- Belt drive system with synchronous motor
- Main platter bearing made from stainless steel runs in bronze bushing with Teflon bottom
- Heavy aluminium sandwich platter with TPE technology for superior resonance damping & felt mat
- 8,6" S-shape aluminium tonearm
- Resonance damping counterweight design
- Gold-plated RCA interconnect cable
- Special turntable feet for effective decoupling for massively reduced risk of acoustical feedback

<b>speed</b>	33, 45 (manual speed change)
<b>principle</b>	belt drive
<b>Speed variance</b>	33: 0,2% 45: 0,18%
<b>Wow &amp; flutter</b>	33: 0,14% 45: 0,13%
<b>platter</b>	300mm
<b>main bearing</b>	stainless steel
<b>tonearm</b>	8,6" S-shape aluminium
<b>effective arm length</b>	218,5 mm
<b>overhang</b>	22,0 mm
<b>effective tonearm mass</b>	8,0g
<b>tracking force range</b>	0 - 30mn (2M 18mn recommended)
<b>included accessories</b>	15 volts DC /0,8A power supply, dust cover
<b>Power consumption</b>	4,0 watts max /< 1 watt standby
<b>dimensions</b>	415 x 130 x 335mm (WxHxD)
<b>weight</b>	5,5 kg net / 8,0 kg gross weight

### Classic turntable with superior tone-arm reaches magical performance levels!

1Xpression Classic S-Shape is the 6th generation of the hi-fi classic Pro-Ject 1, which was presented for the first time in 1991. No other entry-level turntable concept is more audiophile and the current version. It's new innovative gimbal design features a resonance damping counterweight, that allows best performance for any cartridge. The approved belt drive design offers low noise AC motor with effective motor decoupling, ultra precision frequency DC-driven AC generator (like Speed Box) for ultimate speed stability. The complex main platter construction cannot be found elsewhere in this price range and is similar to the Xtension models. Advanced thermo plastic elastomers (TPE) are used in a sandwich construction with aluminium alloy for optimised resonance behaviour. Platter bearing axle is made from low tolerance chrome plated stainless steel running on Teflon bottom in a bronze bearing housing. Turntable main plinth is from low resonance MDF, which effectively is decoupled from structure-born noise by special absorber feet, that use TPE technology.

The top grade aluminium S-Shaped tonearm convinces with a harmonic, musical and engaging sound. Because of the detachable headshell it is very easy to swap out cartridges. For your daily use you can utilize an MM system and for the pure listening pleasure you can change to an MC system.
