DALI PHRAME

FOR EUPHONIA AND HELICON PHANTOM

From In- to On-Wall

IN ADMIRATION OF MUSIC

Dear DALI owner,

Thank you for purchasing DALI Phrame for your DALI Euphonia/Helicon Phantom loudspeakers. As with every DALI accessory product, you are guaranteed high quality designed for optimum performance with your DALI loudspeakers.

With DALI Phrame, your Euphonia/Helicon Phantom In-Wall loudspeakers can be adapted for On-Wall installation.

For correct and safe installation of DALI Phrame, we strongly recommend that you study this installation guide thoroughly and follow all instructions carefully. You should also thoroughly study the owner's manual for your DALI In-Wall loudspeaker - DALI Euphonia IWS 3 Phantom or DALI Helicon IW 200 Phantom.

Best regards,
DALI Loudspeakers

Safety Information

Always comply with the safety warnings in this installation guide and in the owner's manual included with your DALI Euphonia/Helicon Phantom loudspeakers.

If in doubt, always consult your authorised DALI installer or dealer.

DALI Phrame is designed for indoor use. Never use DALI Phrame in moist environments or under extreme cold or hot conditions.

The wall to which DALI Phrame and DALI Euphonia/Helicon Phantom are to be attached must be able

to bear the combined weight of DALI Phrame and DALI Euphonia/Helicon Phantom.

Employ only screws and rawl plugs (not included) that are suitable for the type of wall on which the speakers are to be installed.

Check to make certain that there are no installations inside the wall (electricity, water, heating, gas, etc.) that could be damaged by the installation of DALI Phrame/DALI Euphonia/Helicon Phantom.

Turn off the amplifier/receiver before connecting loudspeaker cables between loudspeakers and amplifier/receiver.

Materials/Tools

The following materials and tools (not included) are needed for the installation of DALI Phrame:

Materials:

- Rawl plugs/wall anchors, 4 pcs. (depending on the type of wall – consult your installer about appropriate rawl plugs/wall anchors)
- Screws, 4 pcs.

Tools:

- Pen for marking
- Level
- Tape measure
- Drill with bit that matches the rawl plugs/wall anchors
- Screwdriver

You will also need the tools listed in the owner's manual of your DALI Euphonia/Helicon Phantom loudspeakers.

Placement of DALI Euphonia/Helicon Phantom

For the best results with your DALI Phrame and Euphonia/Helicon Phantom loudspeakers, mount DALI Phrame in the desired position on the wall. Following the instructions in the owner's manual included with the loudspeakers, mount your Euphonia/Helicon Phantom in DALI Phrame as if it were the wall.

Installation of DALI Phrame

First, measure and mark the desired location for DALI Phrame and the loudspeaker. For optimum performance, please follow the placement guidelines in the owner's manual enclosed with the loudspeakers.

The job is easier with an assistant to hold DALI Phrame in place at the mounting site while you mark the four points where holes are to be drilled for rawl plugs/wall anchors. Make certain that the marks are correctly placed horizontally, so that the loudspeakers are perfectly level.

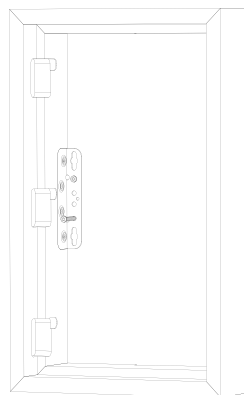

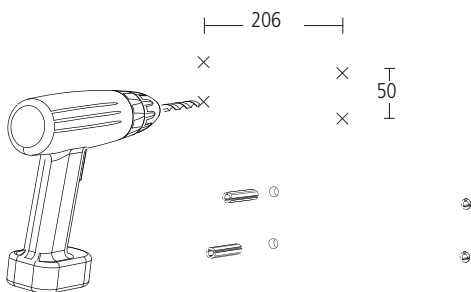

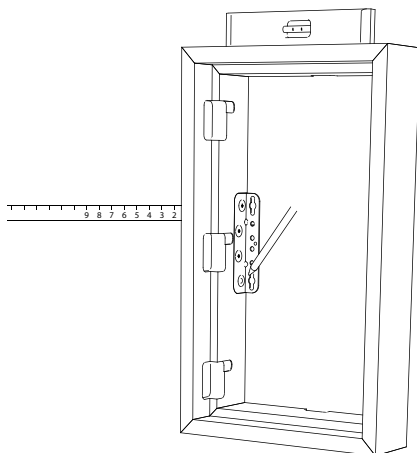

After making the marks, drill holes for the rawl plugs/wall anchors with a drill.

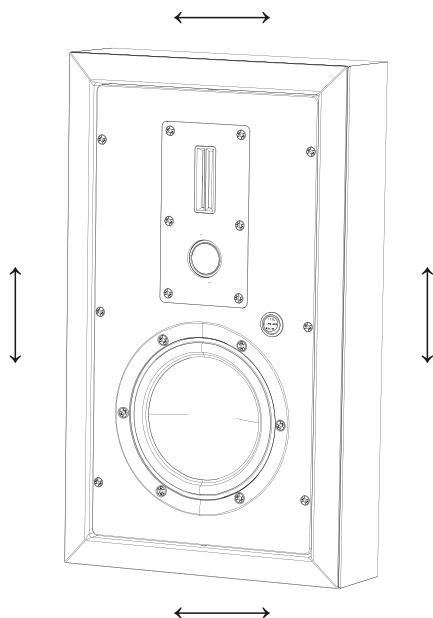

After drilling the holes, insert rawl plugs/wall anchors in the holes.

While your assistant holds the DALI Phrame, attach the frame to the wall with the four mounting screws.

After properly mounting DALI Phrame, loudspeaker cables should be pulled through the cable holes in DALI Phrame. Connect loudspeaker cables as shown in the loudspeaker owner's manual.

Mount DALI Euphonia/Helicon Phantom in DALI Phrame and tighten the screws in the loudspeaker's doglegs, but do not tighten them completely. When the screws are almost completely tightened, center the loudspeaker precisely in DALI Phrame and finish tightening the screws.

■ Painting DALI Phrame

DALI Phrame, like DALI Euphonia/Helicon Phantom, can be painted in the colour of your choice. The frame is supplied spray-painted white, colour code NCS S0502-Y (the same colour as Euphonia/Helicon Phantom). We recommend letting a qualified professional paint DALI Phrame and DALI Euphonia/Helicon Phantom.

■ Maintenance

DALI Phrame is designed for a minimum of maintenance. DALI Phrame can be cleaned with a damp, lint-free cloth using a mild universal cleaning agent. Do not use an abrasive cloth or cleaner, as this may scratch DALI Phrame.

■ Thank you for choosing DALI

We would like to take this opportunity to thank you for choosing DALI. We hope that your new loudspeaker installation will bring you many hours of listening pleasure.

In the unlikely event of problems or questions con-

cerning DALI Phrame or your DALI loudspeakers, please feel free to contact your authorised DALI dealer for assistance.
