| Power consumption | 4 watt max / < 0,5 watt standby |
| Dimensions | 460 x 133 x 360 mm (WxHxD) lid closed |
| Weight | 7,2 kg net |

Outstanding performance from a compact and luxurious turntable configuration

2Xperience DC Acryl is based on the 2Xperience belt-drive concept which incorporates over 20 years of turntable design experience. The addition of precision motor control and a highend 9cc Evolution carbon fiber tonearm means playback quality is vastly improved. The acoustically inert chassis is made from transparent acrylic. The turntable platter is built with heavy, non-resonant materials in a precisely balanced sandwich configuration. A vinyl layer acts as the perfect turntable mat. A screwable and lightweight record clamp eliminates unwanted record vibration and rumbling of the main platter bearing. The audio performance of the final product benefits from the resonance-free platter, avoiding the ringing effect of common metal and glass platters.

The 2Xperience DC Acryl is not only equipped with a highend tonearm, but comes on request with a pre-fitted Ortofon 2M Silver magnetic cartridge that makes use of silver voice coils. An acrylic dust cover is also included. While audio electronics are often hidden and controlled by phone or tablet apps, the analog record player again is put in scene as the center of a hifi system and proudly presented like high-quality speakers.
