

HT/1205

We set out to build the loudest, relatively compact 12" subwoofer available for pure home theater use, and at truly attractive pricing. HT/1205 delivers a brand new 500W Class D power amplifier design, coupled to a 12" (300cm) long travel driver resulting in extremely high output in a smart design. HT is a powerhouse for dedicated high powered home theater applications, will transform the gaming experience, and partners nicely with active wireless speakers.

For REL owners already enjoying our Reference, Serie S and T/i subwoofers designed for both 2-channel and theater use, the HT/1205 is designed to supplement their system's .1/LFE output to produce extremely high output for chest rumbling home theater special effects.
