

DJ 308 e DJ 310, caratterizzati dall'elevata dinamica, sono il complemento ideale per le sorgenti digitali. La guida d'onda anteriore del tweeter domHorn fornisce l'ottima dispersione polare, insieme all'elevata efficienza. La camera di risonanza posteriore e la cupola in seta trattata garantiscono la grande velocità dei transienti, la buona dinamica e le alte frequenze cristalline.

*DJ 308 and DJ 310 feature outstanding dynamics: the perfect match for digital sources. The design of the wave-guide front, exclusive of the domHorn tweeter, provides an excellent polar dispersion along with the high efficiency. The rear chamber and the treated silk dome warrant the speed transient and the crystal clear high frequencies.*
