

UNIVERS

High fidelity USB cable

High-Speed USB cable, recommended for digital connections from a computer to a digital/analog converter (DAC), or from a digital vault to audio-video player. Conductors designed to provide a bitrate of 480 Mbits/s and USB 2.0 compliance (power conductors are separate from data conductors). Everything is brought together to offer a high quality USB connection and release all the details and fineness of the music, not to mention the precision and the colors of high definition videos.

Technical specifications

• Reference	UNIVERS
• Lengths proposed	1.00 m / 2.00 m
• Conductors	99.99% oxygen free silver and copper conductors (SPC) designed to ensure a very high speed transmission and a constant bitrate
• Protection	triple shielding
• Structure	specific structure with data conductors separated from power conductors in order to improve the transmission quality
• Plugs	metallic plugs for an optimum protection against external interferences
• Cable	flat, H 3.5 x L 5.3mm
• Type	1 USB A plug / 1 USB B plug, gold contact
• Particularity	flat tangle-free cable
• Barcode	UNIVERS/1M00 : 3700195862090 UNIVERS/2M00 : 3700195862106
