

X1

„In every sense a great turntable that assures many years of listening pleasure.“

No idea how many Pro-Jects have come to me in my reviewer life. **And they have always romped around the best and often times even led in their price range.**

Pro-Ject shows how it's done: With high-quality, proven for decades and always optimized parts plus a lot of know-how, the Austrians succeed once again with a completely convincing record player of the demanding sales class, which did not start a revolution, but advances the evolution of offers from the manufacturer. The company knows how to improve its own developments, such as the now double-walled carbon tonearm, as well as to impress their customers, such as the Ortofon MM cartridge.
