

Uniti

Uniti

Introducing Naim's new  
range of revolutionary  
all-in-one players

Inspired by our unfaltering  
passion for music and enabled  
by 40 years of tireless innovation  
in engineering, we introduce  
Uniti by Naim – our most  
advanced all-in-one music  
streaming platform

Combining seamless digital technology with a rich  
analogue soul, you can play, rip and store your entire  
music collection.

Uniti allows you to command all your music in one  
place and play with a deep, immersive sound that's  
unmistakably Naim. Use our custom-designed software  
to bring out every note of your digital music with true  
Naim high-fidelity sound through Uniti Atom, Uniti Star  
and Uniti Nova, and our new reference and beautifully  
compact server, Uniti Core.

Your music collection reimaged with Uniti.

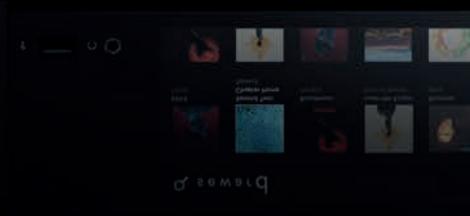

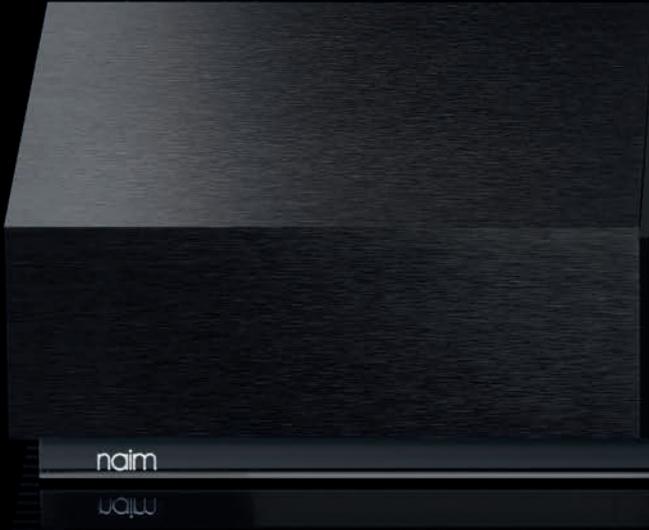

## Uniti

The new Uniti family has been created with three all-in-one players and a server: the reference audiophile Uniti Nova, the versatile CD playing and ripping Uniti Star and the superb compact yet powerful Uniti Atom

Our Uniti Core hard-disk music server completes the range, allowing you to store and stream thousands of albums and back-up all your music in one place. We went back to the drawing board for Uniti, creating a range of state-of-the-art systems that work in harmony with each other and offer infinite possibilities for playing your music.

With each player working independently (or together), simply add speakers to fill your home with breathtaking sound.

## Features

UPnP™  
Streaming

Use UPnP™ (Universal Plug and Play) to read music from storage, or PCs and Macs on the same network as your Uniti, control it all with the Naim app and enjoy playback at up to 32bit/384kHz resolution.

Chromecast  
built-in

New for Uniti is native support for Chromecast built-in. This smart new streaming service creates a seamless link to hundreds of supported apps from your smartphone or tablet and streams directly to your Uniti system.

Spotify®  
Connect

Discover millions of songs from the world's most popular streaming service with the built-in Spotify Connect feature.

TIDAL

The lossless high definition streaming service is integrated into Uniti for an immersive, high-quality sound experience.

iRadio

Tune in to thousands of available internet radio stations and podcasts or curate your favourites for quick access later. Uniti Star and Uniti Nova have an optional DAB+/FM module upgrade.

HDMI ARC  
(Optional  
on Atom)

Uniti players feature an HDMI ARC (Audio Return Channel) connection so you can easily connect your TV to experience audiophile sound quality from your favourite film or game.

Bluetooth  
aptX HD

Pair your Uniti with any compatible Bluetooth device for simple high-quality playback of music from that device.

AirPlay &  
Apple Music

Stream music from your iPhone, iPad or iPod Touch or from iTunes and Apple Music.

USB

Connect your smartphone, tablet, memory stick or USB hard drive via the front or back panel USB connections for playback and charging of devices.

CD  
Playback  
& Ripping

Uniti Star allows you to enjoy your entire CD collection, as well as your digital favourites. Create bit-perfect copies of your CDs and save the data to local storage (Uniti Star, Uniti Core) or to internal storage (Uniti Core).

Multiple  
Digital  
& Analogue  
Inputs

Integrate Uniti with all your audio sources using the digital inputs for TVs, set-top boxes or games consoles, as well as analogue sources such as a turntable (phono stage required).

Headphones

Front panel 3.5mm headphone jack with new upgraded headphone amplifier with significantly improved bass extension.

Multiroom &  
Party Mode

Fill your entire home with the Naim sound using Multiroom and Party Mode. With two or more Uniti products on your home network, you can play back the same music beat-for-beat in up to six rooms, all controlled via the Naim app.

File Format  
Support

Play back lossless music files in WAV, FLAC, AIFF and ALAC formats or stream MP3, AAC and Ogg Vorbis. All Uniti players also support DSD64 & 128 playback with gapless seek to time on all file formats.

Wireless  
Updates

Over-the-air updates via the Naim app will enable you to update your Uniti system at the touch of a button.

Digital music has revolutionised the way we enjoy our favourite songs and albums – your entire collection is right there at your fingertips

But at Naim we believe that convenience shouldn't come at the expense of quality.

We have gone to extraordinary lengths to maximise the quality of digital music streams. Uniti is running on a completely new Naim designed and built streaming platform. The range is the result of significant investment in time and people within our audio laboratories – every component and material was put under the microscope, questioned, refined or replaced with new custom parts at every stage. Uniti's unique and very powerful 40-bit SHARC DSP is so phenomenally accurate that it performs a staggering 2.7 billion calculations per second, giving it enough power to resolve the most complex music signals with ease.

Extreme care has been taken by our highly trained engineers to protect sensitive components in the audio signal path from digital circuitry – isolated circuit boards for both analogue and digital signals, optical isolators to transfer information between the two sides of the products and careful testing and analysis by our audio experts to catch any stray interference.

Driving this digital innovation is a Class A/B integrated amplifier based on the design of one of our most iconic and best-loved integrated amps – the NAIT. This iconic analogue technology is the beating heart within each Uniti system. Running twice as fast as its predecessor; it is an amplifier that has all the distilled audio engineering know-how behind it. A large toroidal transformer sits at the centre of each Uniti system providing vital fuel, allowing the audio electronics to shine by converting a noisy mains supply into a high-calibre power source.

Each system has been designed and painstakingly hand-built in Salisbury with completely new build techniques developed by our engineers, Uniti dedicated technicians and individual cells to create each player from the ground up.

As you move through the Uniti range you will find progressively more innovation resulting in more power, clarity and ultimately a more immersive and emotionally involving musical experience.

## Inside Uniti all-in-one Players

Everything about new Uniti has been scrutinised to achieve the best sound quality. It's far more powerful, has masses of memory, will adapt to new technology and seamlessly integrates across Naim's existing product range

### Made of Great Things ...

Each Uniti system has been built by hand, from individual components to the brushed black aluminium cases. As well as preventing radio frequency interruption, the casework also houses built-in antennae for Wi-Fi and Bluetooth to provide an aesthetic that echoes our classic amplifiers.

### Revolutionary New Streaming Platform

Our new streaming platform is unique. It has been built by our engineers to be as future proof as possible, while providing signature Naim sound quality. The powerful platform has also allowed the integration of Chromecast built-in, providing access to thousands of streaming services.

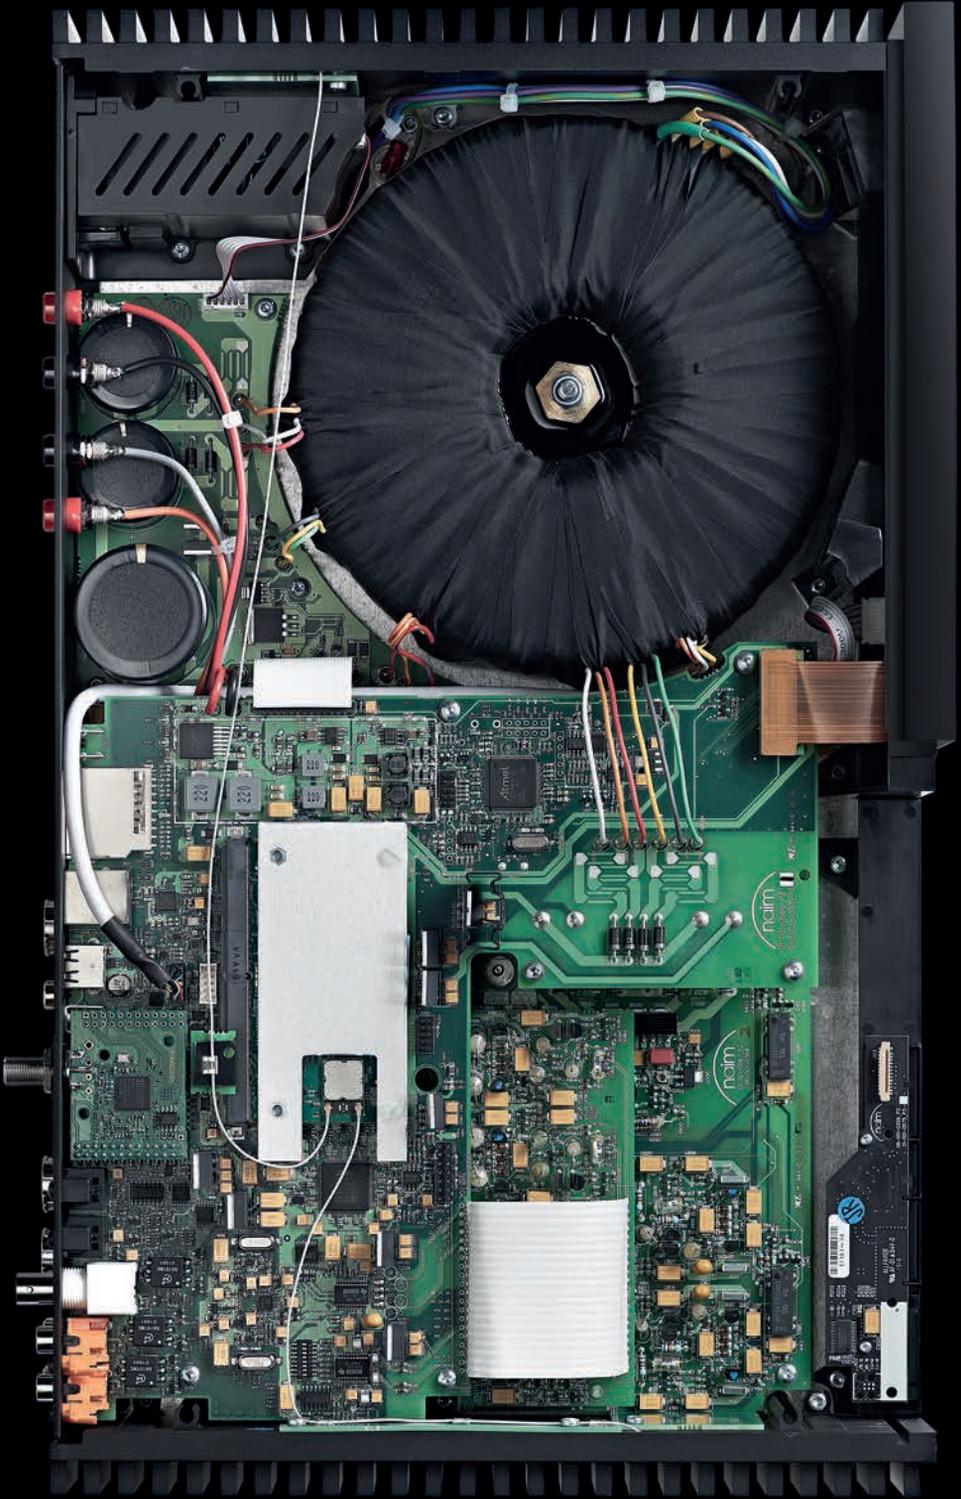

### State-of-the-Art Wi-Fi

New Uniti players feature the very latest Wi-Fi, supporting both 2.4 and 5GHz, alongside far better internal buffer and memory. The aerials are integrated within the heatsink – we've also installed a back reflector to prevent any harmful radiation from entering the unit.

### Digitally Controlled Analogue Volume

At the heart of all Uniti players is an audiophile volume control, adjusting levels in the analogue domain to a premium digital resolution. The design is taken from the NAC-N 272 and its smooth structure is inspired by our reference amplification system, Statement.

The new signature digitally controlled analogue volume dial, inspired by our reference Statement amplification system, is just one of the features in this beautifully engineered brushed aluminium chassis. It also boasts extruded heatsinks for thermal stability and a highly-polished full colour LCD glass display providing you with rich imagery of your favourite album artwork. Impeccably crafted with materials chosen to be in complete service of sound, Uniti is alive with unique visual contrasts that make it a masterpiece of industrial design.

### Functional Symmetry

All functional elements are as embedded into the core design DNA of Uniti as much as possible. The CD slot feature is presented as a bold split line, the display is presented as a whole cheek, the heatsinks are captured within the overall footprint and the logo bar embedded into the base. The combination is a visually clean, beautifully finished enclosure built to the highest levels of precision.

The end result is the perfect amalgamation of where we as a company have come from and where we are going: hand-built products designed and manufactured in Wiltshire to provide many years of musical satisfaction whilst being completely in tune with the demands of the modern music lover.

# Uniti Atom

Uniti Atom is a beautiful compact multi-source music player that will seduce you with its amazing sound quality and outstanding aesthetics. Its 40W integrated amplifier and high resolution music streaming capabilities will flood your room with incredible sound.

Uniti Atom is perfect as a high-end main system or even for use in the kitchen or study, where space is at a premium. Just add speakers. Our Naim app for iOS and Android combines all of your music sources in one place, and the option of adding an HDMI connection (Arc Return Channel) to boost television audio, makes the surprisingly powerful Uniti Atom even more appealing. Its charming good looks and even better sound will make you wonder how you ever lived without it.

## Power-Line Lite

A new Naim designed mains cable, Power-Line Lite, will be included in the box with every Uniti system (UK only).

Power-Line Lite has been developed alongside the new Uniti range and uses the same mains cable Naim have trusted in our listening tests for over 15 years. Featuring a high-gloss floating cable retainer, the mains cable has a thermoset resin case with floating pins for superior electrical contact and the same decoupling techniques used in the original Power-Line.

# Uniti Star

The clue is in the name: this system is the star of the show. With plenty of features and the ability to play, rip, store and serve your treasured music collection, Uniti Star offers infinite possibilities. Since it includes a CD player alongside streaming and amplification technology, our engineers had to pay special attention to preserving thermal stability and decreasing interference between components. The custom-integrated CD drive also doubles as a ripper, making Uniti Star the most versatile all-in-one in the range. Ready to go with practically any speaker set-up, Uniti Star will have you rediscovering your entire music collection with a deep, immersive sound.

Uniti Star is a powerhouse offering 70W per channel into 8 Ohms; it will match your desire to turn up the volume effortlessly. Explore the new world of digital audio and stay connected to your CDs: the powerful new Uniti Star is the perfect solution.

# Uniti Nova

Uniti Nova is proof that audiophile quality can be achieved with an all-in-one player. Whichever source you choose, your music will be transformed into incredible sonic experiences.

The reference player in the range, Uniti Nova has been configured to offer the very best solution that we can implement in a single-box, compact enclosure. All the available space has been used to provide 80 watts per channel of Class A/B amplification capable of driving the most demanding loudspeakers – detail and depth you'll hear in every note, riff and chorus.

Uniti Nova boasts outstanding new technology which really sets it apart from the rest of the range. Its circuitry features the highest quality discrete components, superior isolation, more inputs than you can shake a stick at and a massive toroidal transformer that brings a whole new meaning to the term heavyweight. Uniti Nova is as good as an all-in-one player can get.

# Uniti Core

Uniti Core represents the essence of digital music. It is a seriously powerful machine that will store up to 100,000 tracks on an HDD or SSD; serve up to 12 streams and allows you to fit the hard drive of your choice. No longer will you have to send your unit back to Naim HQ if you need a new drive.

The new Uniti Core is a state of the art piece of audio technology. Every element of this dedicated music server – from the customised operating system, the enhanced ripping engine and the linear power supply to the low-vibration aluminium casework – has been engineered to deliver consistent, reliable performance and highest sound quality.

Uniti Core is a fuss-free, no-compromise solution to ripping, storing, cataloguing and playing all of your music in one place. Move your entire collection of music online with the bit-perfect ripping technology at Uniti Core's heart.

## Command Your Music

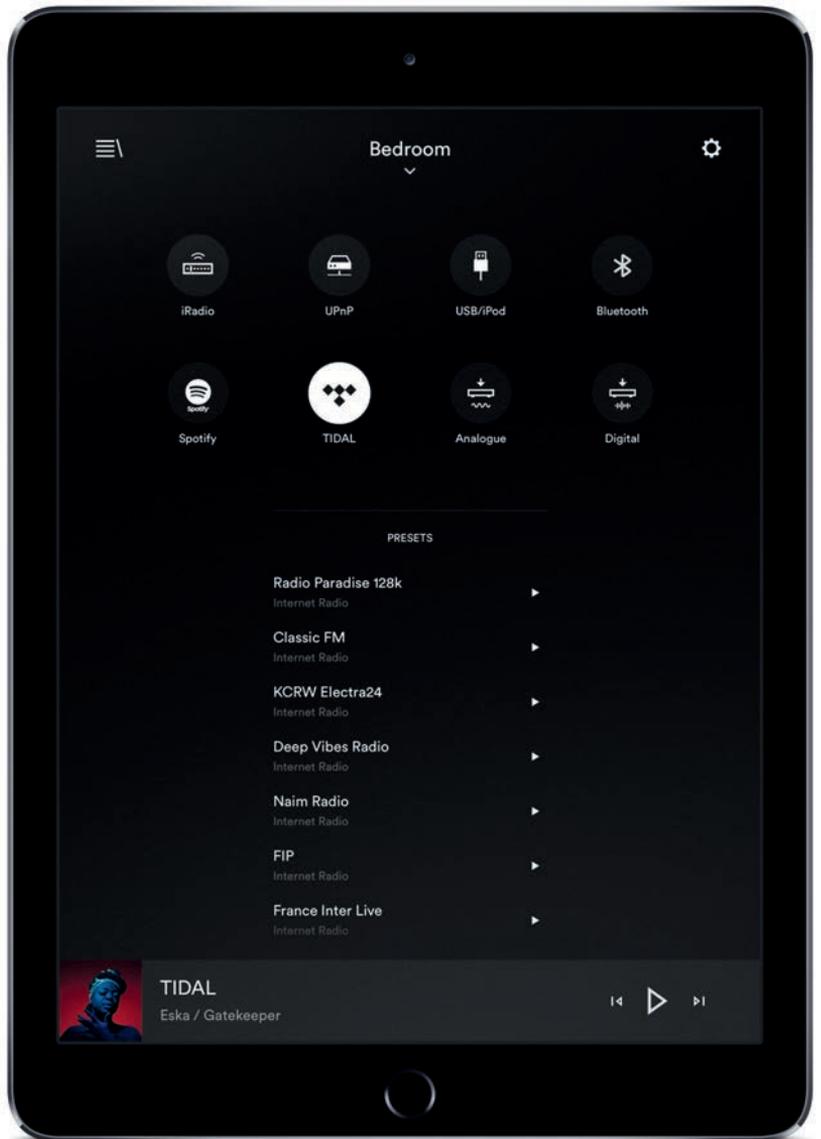

The custom Naim app gives you effortless control over individual or multiple Uniti products

Access all your music including favourite radio stations, streaming services and playlists, explore artist discographies and biographies, and update your system wirelessly with a single tap.

### Bi-Directional Remote Control

Uniti all-in-one players have a full colour LCD display with a proximity sensor that wakes up on approach, accompanied by a bi-directional intelligent remote control giving you complete freedom of movement. Our new remote pairs with your Uniti product as soon as it's out of the box and turned on; its clean lines contain versatile functionality and beautiful white backlit buttons and is an intrinsic part of new Uniti.

Available from

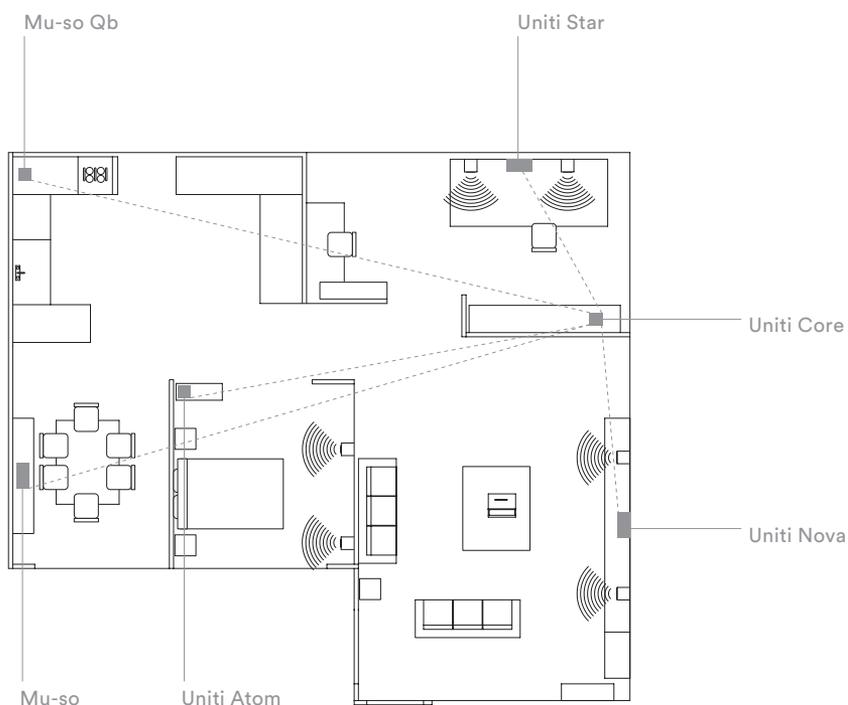

## Build your multiroom system

Play music between any combination of Uniti devices or other Naim streaming systems in up to six rooms of your home

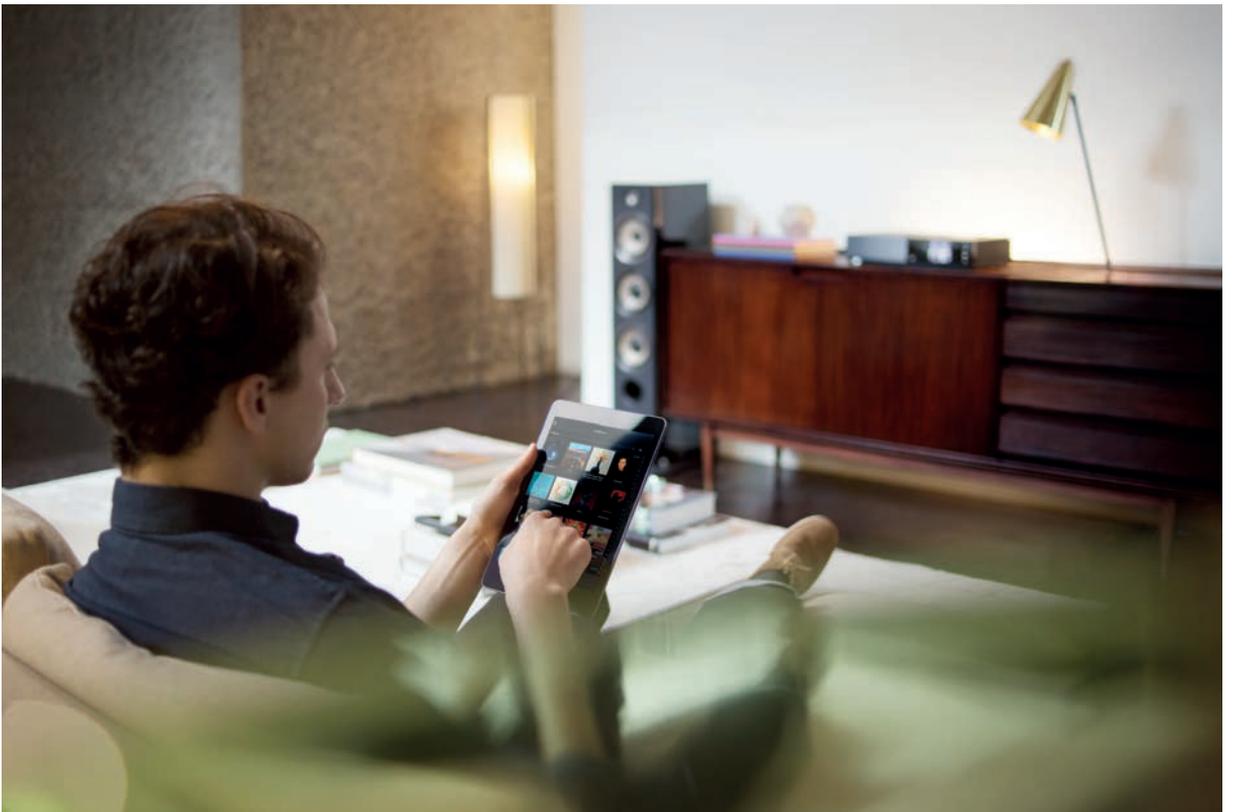

Choose the same song in beat-perfect sync or play different music in different rooms all via the Naim app.

It's simple to connect your Uniti player to other Uniti or Naim streaming products using either Wi-Fi or a wired Ethernet connection. Everything is controlled at your fingertips via the Naim iOS and Android app. You can seamlessly sync up to six units by hitting Party Mode and play the same song across all systems – our app lets you change volume across all systems at once for complete control. Or you can choose to play different songs in any room of your home to create different moods and musical atmosphere.

Mu-so Qb, compact wireless music system

Naim founder, Julian Vereker MBE (1945 – 2000), was a successful racing car driver, self-taught engineer and entrepreneur with a deep passion for music.

Spending his spare time listening to the greatest artists of the 1960s and 70s, as well as his own friends playing live, Julian found the performance of playback at home fell woefully short in almost every area that mattered.

Not content with second best, he set about designing his own amplifiers and loudspeakers, completely unaware that he was laying the foundations for a range of iconic and award-winning hi-fi products that would reach well into the next century. Julian had no ideas of fame or fortune, he simply wanted to experience music replayed in the truest and purest possible form.

These were our founding values in 1973 and they continue to fuel every aspect of our progress today. The technology we use to achieve our aims will always change and evolve with time, but our ultimate goal remains the same – to bring our listeners a deeper and more intense experience of music.

Our original and iconic NAIT integrated amplifier, released in 1983.
